THE ANNALS
of
PROBABILITY

An Official Journal of the
Institute of Mathematical Statistics

VOLUME 15

1987

CONTENTS OF VOLUME 15

Special Invited Papers, Wald Lectures and Articles

ADLER, ROBERT J. AND SAMORODNITSKY, GENNADY. Tail behaviour for the suprema of Gaussian processes with applications to empirical processes 1339–1351

ALEXANDER, KENNETH S. The central limit theorem for empirical processes on Vapnik–Červonenkis classes 178–203

ALZAID, ABDULHAMID A., RAO, C. RADHAKRISHNA AND SHANBHAG, D. N. An extension of Spitzer's integral representation theorem with an application 1210–1216

ANDERSEN, N. T. AND DOBRIĆ, V. The central limit theorem for stochastic processes 164–177

ANDERSON, KEVIN K. AND ATHREYA, KRISHNA B. A renewal theorem in the infinite mean case 388–393

ATHREYA, KRISHNA B. AND ANDERSON, KEVIN K. A renewal theorem in the infinite mean case 388–393

AVRAM, FLORIN AND TAQQU, MURAD S. Noncentral limit theorems and Appell polynomials 767–775

BALLY, VLAD AND STOICA, LUCRETIU. A class of Markov processes which admit local times 241–262

BARBOUR, A. D. Asymptotic expansions in the Poisson limit theorem 748–766

BENASSI, ALBERT AND FOUQUE, JEAN-PIERRE. Hydrodynamical limit for the asymmetric simple exclusion process 546–560

BERGER, TOBY AND HAJEK, BRUCE. A decomposition theorem for binary Markov random fields 1112–1125

BEZUIDENHOUT, CAROL. A large deviations principle for small perturbations of random evolution equations 646–658

BEZUIDENHOUT, CAROL. Singular perturbations of degenerate diffusions 1014–1043

BLEHER, P. M. AND MAJOR, P. Critical phenomena and universal exponents in statistical physics. On Dyson's hierarchical model 431–477

BOUGEROL, PHILIPPE. Tightness of products of random matrices and stability of linear stochastic systems 40–74

BROWN, TIMOTHY C. Independent subsets of correlation and other matrices 416–422

BRUSS, F. THOMAS AND SAMUELS, STEPHEN M. A unified approach to a class of optimal selection problems with an unknown number of options 824–830

BURDZY, KRZYSZTOF. Brownian excursions and minimal thinness. I 676–689

BURKHOLDER, D. L. A sharp and strict L^p-inequality for stochastic integrals 268–273

CHAGANTY, NARASINGA RAO AND SETHURAMAN, JAYARAM. Limit

theorems in the area of large deviations for some dependent random variables 628–645
CHAYES, J. T., CHAYES, L. AND NEWMAN, C. M. Bernoulli percolation above threshold: An invasion percolation analysis 1272–1287
CHAYES, L., NEWMAN, C. M. AND CHAYES, J. T. Bernoulli percolation above threshold: An invasion percolation analysis 1272–1287
CHUNG, F. R. K., DIACONIS, PERSI AND GRAHAM, R. L. Random walks arising in random number generation 1148–1165
CLARK, CHARLES R. Asymptotic properties of some multidimensional diffusions 985–1008
CRANSTON, M. On the means of approach to the boundary of Brownian motion 1009–1013
CSÖRGŐ, MIKLÓS, HORVÁTH, LAJOS AND STEINEBACH, JOSEF. Invariance principles for renewal processes 1441–1460
DEBLASSIE, R. DANTE. Stopping times of Bessel processes 1044–1051
DEHEUVELS, PAUL AND DEVROYE, LUC. Limit laws of Erdös–Rényi–Shepp type 1363–1386
DEVROYE, LUC AND DEHEUVELS, PAUL. Limit laws of Erdös–Rényi–Shepp type 1363–1386
DIACONIS, PERSI, GRAHAM, R. L. AND CHUNG, F. R. K. Random walks arising in random number generation 1148–1165
DOBRIĆ, V. AND ANDERSEN, N. T. The central limit theorem for stochastic processes 164–177
DONEY, R. A. On Wiener-Hopf factorisation and the distribution of extrema for certain stable processes 1352–1362
DUDLEY, R. M. Universal Donsker classes and metric entropy ... 1306–1326
EINMAHL, UWE. Strong invariance principles for partial sums of independent random vectors 1419–1440
EL-NEWEIHI, EMAD AND SAVITS, THOMAS H. Convolution of the IFRA scaled-mins class 423–427
ESCRIBA, L. BARBA. A stopped Brownian motion formula with two sloping line boundaries 1524–1526
ETHIER, S. N. AND GRIFFITHS, R. C. The infinitely-many-sites model as a measure-valued diffusion 515–545
FALKNER, NEIL. Conditional Brownian motion in rapidly exhaustible domains 1501–1514
FIEBIG, U. AND VAN DEN BERG, J. On a combinatorial conjecture concerning disjoint occurrences of events 354–374
FINE, TERRENCE L. AND GRIZE, YVES L. Continuous lower probability-based models for stationary processes with bounded and divergent time averages 783–803
FITZSIMMONS, P. J. A converse to a theorem of P. Lévy 1515–1523
FOUQUE, JEAN-PIERRE AND BENASSI, ALBERT. Hydrodynamical limit for the asymmetric simple exclusion process 546–560
FRANGOS, NIKOS E. AND IMKELLER, PETER. Quadratic variation for a class of $L \log^+ L$-bounded two-parameter martingales ... 1097–1111

FRITZ, J. Gradient dynamics of infinite point systems 478–514
GALVES, ANTONIO, OLIVIERI, ENZO AND VARES, MARIA EULALIA. Metastability for a class of dynamical systems subject to small random perturbations 1288–1305
GALVES, ANTONIO AND PRESUTTI, ERRICO. Edge fluctuations for the one dimensional supercritical contact process 1131–1145
GINÉ, EVARIST AND ZINN, JOEL. The law of large numbers for partial sum processes indexed by sets 154–163
GRAHAM, R. L., CHUNG, F. R. K. AND DIACONIS, PERSI. Random walks arising in random number generation 1148–1165
GRIFFITHS, R. C. AND ETHIER, S. N. The infinitely-many-sites model as a measure-valued diffusion 515–545
GRIZE, YVES L. AND FINE, TERRENCE L. Continuous lower probability-based models for stationary processes with bounded and divergent time averages 783–803
GRÜBEL, RUDOLF. On subordinated distributions and generalized renewal measures 394–415
HAEUSLER, ERICH AND MASON, DAVID M. A law of the iterated logarithm for sums of extreme values from a distribution with a regularly varying upper tail 932–953
HAHN, M. G., KUELBS, J. AND SAMUR, J. D. Asymptotic normality of trimmed sums of Φ-mixing random variables 1395–1418
HAJEK, BRUCE AND BERGER, TOBY. A decomposition theorem for binary Markov random fields 1112–1125
HALL, PETER. Edgeworth expansion for Student's t statistic under minimal moment conditions 920–931
HARRISON, J. M. AND WILLIAMS, R. J. Multidimensional reflected Brownian motions having exponential stationary distributions 115–137
HILL, BRUCE M., LANE, DAVID AND SUDDERTH, WILLIAM. Exchangeable urn processes 1586–1592
HILL, THEODORE P. Partitioning general probability measures .. 804–813
HOOVER, DOUGLAS N. A characterization of adapted distribution 1600–1611
HORVÁTH, LAJOS, STEINEBACH, JOSEF AND CSÖRGŐ, MIKLÓS. Invariance principles for renewal processes 1441–1460
HWANG, J. S. On a problem of Kahane about the image of Gaussian Taylor series 1203–1209
IMKELLER, PETER AND FRANGOS, NIKOS E. Quadratic variation for a class of $L \log^+ L$-bounded two-parameter martingales ... 1097–1111
JAIN, NARESH C. AND PRUITT, WILLIAM E. Lower tail probability estimates for subordinators and nondecreasing random walks 75–101
JAIN, NARESH C. AND PRUITT, WILLIAM E. Maximal increments of local time of a random walk 1461–1490
JAJTE, R. On the existence of the ergodic Hilbert transform 831–835

JANSON, SVANTE. Maximal spacings in several dimensions 274–280
JOE, HARRY. Majorization, randomness and dependence for multivariate distributions 1217–1225
JUREČKOVÁ, JANA AND SEN, PRANAB KUMAR. A second-order asymptotic distributional representation of M-estimators with discontinuous score functions 814–823
KALLENBERG, OLAV. Homogeneity and the strong Markov property 213–240
KEENER, ROBERT AND WOODROOFE, MICHAEL. Asymptotic expansions in boundary crossing problems 102–114
KELLER, G., KERSTING, G. AND RÖSLER, U. On the asymptotic behaviour of discrete time stochastic growth processes 305–343
KELLY, F. P. One-dimensional circuit-switched networks 1166–1179
KELLY, F. P. AND MACPHEE, I. M. The number of packets transmitted by collision detect random access schemes 1557–1568
KENDALL, WILFRID S. The radial part of Brownian motion on a manifold: A semimartingale property 1491–1500
KERSTING, G., RÖSLER, U. AND KELLER, G. On the asymptotic behaviour of discrete time stochastic growth processes 305–343
KESTEN, HARRY. The 1986 Wald Memorial Lectures: Percolation theory and first-passage percolation 1231–1271
KEY, ERIC S. Limiting distributions and regeneration times for multitype branching processes with immigration in a random environment 344–353
KLASS, MICHAEL AND TEICHER, HENRY. The central limit theorem for exchangeable random variables without moments. 138–153
KLIEMANN, WOLFGANG. Recurrence and invariant measures for degenerate diffusions 690–707
KRENGEL, ULRICH AND SUCHESTON, LOUIS. Prophet compared to gambler: An inequality for transforms of processes 1593–1599
KUELBS, J., SAMUR, J. D. AND HAHN, M. G. Asymptotic normality of trimmed sums of Φ-mixing random variables 1395–1418
KWAPIEN, STANISLAW. Decoupling inequalities for polynomial chaos 1062–1071
KWAPIEN, STANISLAW AND WOYCZYNSKI, WOJBOR A. Double stochastic integrals, random quadratic forms and random series in Orlicz spaces 1072–1096
LALLEY, S. P. AND SELLKE, T. A conditional limit theorem for the frontier of a branching Brownian motion 1052–1061
LANDERS, DIETER AND ROGGE, LOTHAR. Nonuniform estimates in the conditional central limit theorem 776–782
LANE, DAVID, SUDDERTH, WILLIAM AND HILL, BRUCE M. Exchangeable urn processes 1586–1592
LYNCH, JAMES AND SETHURAMAN, JAYARAM. Large deviations for processes with independent increments 610–627

MACPHEE, I. M. AND KELLY, F. P. The number of packets transmitted by collision detect random access schemes 1557–1568
MAEJIMA, MAKOTO AND RACHEV, SVETLOZAR T. An ideal metric and the rate of convergence to a self-similar process 708–727
MAJOR, P. AND BLEHER, P. M. Critical phenomena and universal exponents in statistical physics. On Dyson's hierarchical model 431–477
MANDELBAUM, AVI. Continuous multi-armed bandits and multi-parameter processes 1527–1556
MASON, DAVID M. AND HAEUSLER, ERICH. A law of the iterated logarithm for sums of extreme values from a distribution with a regularly varying upper tail 932–953
MASON, DAVID M. AND VAN ZWET, WILLEM R. A refinement of the KMT inequality for the uniform empirical process 871–884
MCCONNELL, TERRY R. A two-parameter maximal ergodic theorem with dependence 1569–1585
MILMAN, V. D. AND PISIER, G. Gaussian processes and mixed volumes 292–304
NEWMAN, CHARLES M. Decomposition of binary random fields and zeros of partition functions 1126–1130
NEWMAN, C. M., CHAYES, J. T. AND CHAYES, L. Bernoulli percolation above threshold: An invasion percolation analysis 1272–1287
NEY, P. AND NUMMELIN, E. Markov additive processes I. Eigenvalue properties and limit theorems 561–592
NEY, P. AND NUMMELIN, E. Markov additive processes II. Large deviations 593–609
NUMMELIN, E. AND NEY, P. Markov additive processes I. Eigenvalue properties and limit theorems 561–592
NUMMELIN, E. AND NEY, P. Markov additive processes II. Large deviations 593–609
O'BRIEN, GEORGE L. Extreme values for stationary and Markov sequences 281–291
OLIVIERI, ENZO, VARES, MARIA EULALIA AND GALVES, ANTONIO. Metastability for a class of dynamical systems subject to small random perturbations 1288–1305
OSSIANDER, MINA. A central limit theorem under metric entropy with L_2 bracketing 897–919
PELIGRAD, MAGDA. On the central limit theorem for ρ-mixing sequences of random variables 1387–1394
PINSKY, ROSS G. Recurrence, transience and bounded harmonic functions for diffusions in the plane 954–984
PISIER, G. AND MILMAN, V. D. Gaussian processes and mixed volumes 292–304
PITTEL, B. On probabilistic analysis of a coalesced hashing algorithm 1180–1202
PRESUTTI, ERRICO AND GALVES, ANTONIO. Edge fluctuations for the one dimensional supercritical contact process 1131–1145

PRUITT, WILLIAM E. The contribution to the sum of the summand of maximum modulus 885–896
PRUITT, WILLIAM E. AND JAIN, NARESH C. Lower tail probability estimates for subordinators and nondecreasing random walks 75–101
PRUITT, WILLIAM E. AND JAIN, NARESH C. Maximal increments of local time of a random walk 1461–1490
RACHEV, SVETLOZAR T. AND MAEJIMA, MAKOTO. An ideal metric and the rate of convergence to a self-similar process 708–727
RAO, C. RADHAKRISHNA, SHANBHAG, D. N. AND ALZAID, ABDULHAMID A. An extension of Spitzer's integral representation theorem with an application 1210–1216
ROGGE, LOTHAR AND LANDERS, DIETER. Nonuniform estimates in the conditional central limit theorem 776–782
ROOTZÉN, HOLGER. A ratio limit theorem for the tails of weighted sums 728–747
ROSEN, JAY. Joint continuity of the intersection local times of Markov processes 659–675
RÖSLER, U., KELLER, G. AND KERSTING, G. On the asymptotic behaviour of discrete time stochastic growth processes 305–343
SAADA, ELLEN. A limit theorem for the position of a tagged particle in a simple exclusion process 375–381
SALISBURY, THOMAS S. Three problems from the theory of right processes 263–267
SAMORODNITSKY, GENNADY AND ADLER, ROBERT J. Tail behaviour for the suprema of Gaussian processes with applications to empirical processes 1339–1351
SAMUELS, STEPHEN M. AND BRUSS, F. THOMAS. A unified approach to a class of optimal selection problems with an unknown number of options 824–830
SAMUR, J. D., HAHN, M. G. AND KUELBS, J. Asymptotic normality of trimmed sums of Φ-mixing random variables 1395–1418
SAVITS, THOMAS H. AND EL-NEWEIHI, EMAD. Convolution of the IFRA scaled-mins class 423–427
SCHONMANN, ROBERTO HENRIQUE. A new proof of the complete convergence theorem for contact processes in several dimensions with large infection parameter 382–387
SCHONMANN, ROBERTO HENRIQUE. Absence of a stationary distribution for the edge process of subcritical oriented percolation in two dimensions 1146–1147
SELLKE, T. AND LALLEY, S. P. A conditional limit theorem for the frontier of a branching Brownian motion 1052–1061
SEN, PRANAB KUMAR AND JUREČKOVÁ, JANA. A second-order asymptotic distributional representation of M-estimators with discontinuous score functions 814–823
SETHURAMAN, JAYARAM AND CHAGANTY, NARASINGA RAO. Limit

theorems in the area of large deviations for some dependent random variables 628–645
SETHURAMAN, JAYARAM AND LYNCH, JAMES. Large deviations for processes with independent increments 610–627
SHANBHAG, D. N., ALZAID, ABDULHAMID A. AND RAO, C. RADHAKRISHNA. An extension of Spitzer's integral representation theorem with an application 1210–1216
STEINEBACH, JOSEF, CSÖRGŐ, MIKLÓS AND HORVÁTH, LAJOS. Invariance principles for renewal processes 1441–1460
STOICA, LUCRETIU AND BALLY, VLAD. A class of Markov processes which admit local times 241–262
SUCHESTON, LOUIS AND KRENGEL, ULRICH. Prophet compared to gambler: An inequality for transforms of processes 1593–1599
SUDDERTH, WILLIAM, HILL, BRUCE M. AND LANE, DAVID. Exchangeable urn processes 1586–1592
TALAGRAND, MICHEL. Donsker classes and random geometry ... 1327–1338
TALAGRAND, MICHEL. Measurability problems for empirical processes 204–212
TALAGRAND, MICHEL. The Glivenko-Cantelli problem 837–870
TAQQU, MURAD S. AND AVRAM, FLORIN. Noncentral limit theorems and Appell polynomials 767–775
TEICHER, HENRY AND KLASS, MICHAEL. The central limit theorem for exchangeable random variables without moments 138–153
VAN DEN BERG, J. AND FIEBIG, U. On a combinatorial conjecture concerning disjoint occurrences of events 354–374
VAN ZWET, WILLEM R. AND MASON, DAVID M. A refinement of the KMT inequality for the uniform empirical process 871–884
VARES, MARIA EULALIA, GALVES, ANTONIO AND OLIVIERI, ENZO. Metastability for a class of dynamical systems subject to small random perturbations 1288–1305
WATANABE, SHINZO. Analysis of Wiener functionals (Malliavin calculus) and its applications to heat kernels 1–39
WILLIAMS, R. J. AND HARRISON, J. M. Multidimensional reflected Brownian motions having exponential stationary distributions 115–137
WOODROOFE, MICHAEL AND KEENER, ROBERT. Asymptotic expansions in boundary crossing problems 102–114
WOYCZYNSKI, WOJBOR A. AND KWAPIEN, STANISLAW. Double stochastic integrals, random quadratic forms and random series in Orlicz spaces 1072–1096
ZINN, JOEL AND GINÉ, EVARIST. The law of large numbers for partial sum processes indexed by sets 154–163

Book Reviews

DONNELLY, PETER. Review of *Point Processes and their Statistical Inference* by Alan F. Karr 1226–1227

GRIMMETT, G. R. Two books on random graphs: *Random Graphs* by Béla Bollobás and *Graphical Evolution: An Introduction to the Theory of Random Graphs* by Edgar Palmer 1612–1617
